PROFESSIONAL SUMMARY

Backend Developer specializing in Java and Spring Boot with experience in building scalable RESTful and reactive microservices. Proficient in Spring Boot 3.x, Spring Security, WebFlux, JPA/Hibernate, and PostgreSQL. Hands-on experience with JWT-based authentication, Dockerized deployments, Redis caching, and event-driven systems using Kafka and RabbitMQ. Strong understanding of system design, distributed systems, and clean architecture principles.

TECHNICAL SKILLS

Programming Languages	Java (21), Python, C++
Frameworks	Spring Boot 3.x, Spring WebFlux, Spring Security, Spring Data JPA, Hibernate
API Technologies	RESTful APIs, GraphQL
Databases & Caching	PostgreSQL, MySQL, MongoDB, Redis
Messaging	Apache Kafka, RabbitMQ
DevOps & Tools	Docker, Git, Jenkins, Maven, Gradle, Postman
Testing	JUnit 5, Mockito
Cloud	AWS (EC2, S3)
Operating Systems	Linux (Ubuntu, Red Hat), Windows

PROJECTS

Real-Time Chat System — Spring Boot, WebSockets, Redis, STOMP

- Built a real-time chat system using Spring Boot and WebSockets supporting concurrent users
- Implemented Redis for session management and caching to reduce database load
- Designed message broadcasting mechanism for low-latency real-time communication

Layered Spring Architecture — Spring Boot, PostgreSQL, Docker, JWT

- Developed scalable backend application using Spring Boot with RESTful API endpoints
- Implemented JWT-based authentication with role-based access control (RBAC)
- Designed layered architecture following SOLID principles and clean code practices
- Containerized application using Docker for consistent deployment across environments

Secure Banking System — Java, Spring Security, AES Encryption, MySQL

- Designed secure transaction system with AES encryption and fraud detection mechanisms
- Implemented Spring Security with role-based access control for different privilege levels
- Built multi-module Java application with clear separation of concerns

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science — **2023 – 2027 (Expected)**
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS & ACHIEVEMENTS

- Completed Spring Framework and Spring Boot training
- Implemented reactive microservices using Spring WebFlux and Project Reactor
- Designed and deployed containerized microservices using Docker and CI/CD pipelines
